SINGLE HYACINTH

Select Named Dutch Hyacinths

N. B. Our Select Named Hyacinths are the cream of the Holland nurseries—and are EXTRA-SELECTED TOP-ROOTS, 19 cm. and upward—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold, being larger and better than the First- or Second-size bulbs often sent out at lower prices.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying

in their order whether bulbs are wanted for pot, glass, or garden culture.

The names of our Hyacinths and Tulips as quoted in this catalogue are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses.

The double varieties that do well for forcing in water are distinguished by two asterisks (**).
